Professional Summary

Aspiring Software Engineer graduating July 2026 with hands-on experience developing scalable web applications, backend services, and workflow automation tools using React, Next.js, Node.js, and MySQL. Contributed to production-level internal systems during an internship at FullSuite and served as an IT Project Leader for a ticketing system designed for real operational workflows. TOPCIT Level 3 certified with a strong foundation in software engineering, system architecture, API integration, and cloud-based deployment workflows.

Experience

Associate Software Engineer (Intern) · FullSuite

Jan 2026 - May 2026

- Developed and deployed a Filing Module (Leave Management System) from scratch using React and Node.js, enabling administrators, managers, and employees to manage leave requests, PTO, overtime, and shift changes; resolving date inconsistencies, negative PTO balance errors, and inefficient payroll reporting present in the existing system.
 - Conducted User Acceptance Testing (UAT) and performance testing on Filing Module API endpoints, validating reliability and functional correctness before integration.
 - Strengthened system security by implementing XSS input validation, JWT revalidation hardening, and secured HTTP headers to address common web vulnerabilities.
 - Built a Google Apps Script automation that reduced placeholder identification and data entry for synthetic data generation from up to 2 days down to under 5 minutes, and proposed a structured maintainability approach for future developers.
-

Projects

SLU CCA Ticketing System - Full-Stack Lead

- Led the design and delivery of a full ticketing platform using React and Node.js for a real stakeholder-based operational workflow system.
 - Designed and integrated 3 user-role modules (admin, distributor, customer), streamlining end-to-end ticket management and sales reporting processes.
 - Managed multiple iterative feedback cycles with stakeholders to ensure system requirements matched real operational needs.
 - Implemented automated sales reporting, eliminating manual tallying and significantly reducing post-event reporting time.
-

Education

Saint Louis University

Bachelor of Science in Information Technology

- Awards: Consistent Dean's Lister

Baguio City, Benguet

Expected July 2026

Certifications

TOPCIT (Test of Practical Competency in ICT) – Level 3 (Korea)

Certified in practical ICT competency covering software development, system design, algorithms, and real-world problem solving in IT environments.

Skills

Languages: JavaScript, Java, Python, PHP, HTML/CSS

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express, REST APIs, Prisma

Cloud & DevOps: AWS, Docker, Vercel, Linux (Ubuntu), GitHub Actions, SSH, Cron

Databases & Tools: MySQL, Git, Figma

Core Competencies: System Architecture, Infrastructure Design, Problem Solving, Adaptability
